RE: LFPCN41242

To: Our Valued Customers

From: Littelfuse Product Management Team

Subject: LFPCN41242 - Obsolete LED Protector PLED6M Series And Propose PLED6N Series as Its Replacement

Because of weak demand for LED Protector PLED6M Series, Littelfuse would like to notify you the obsolescence of PLED6M Series. Littelfuse will no longer supply part number PLED6M in POWERMITE package, but instead we propose part number PLED6N in SOD-123FL package as its replacement part, which is expected to be released by end of Q1 2017. These two products are electrically identical, but are in different packages.

Meanwhile, our last buy date of PLED6M is Jan 10th 2017. Thus we strongly suggest customers to build enough buffer quantity to cover the 2017 demand due to customer qualification period of PLED6N.

This notification is for your information and acknowledgement. If you require more information, please contact Littelfuse® within 30 days of the notification date.

If you have any other questions or concerns, please contact Littelfuse® local sales office or Meng Wang, Assistant Product Manager.

We highly value your business and look forward to assisting you whenever possible.

Best Regards,

Meng Wang
